DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/25/2006 has been entered.

Status of Claims

2. Claims 14-15, 20-21, 23-24, 26-40, 43-51, 64-65 are cancelled. Claims 1-13, 16-19, 22, 25, 41-42, 52-53 and 66-73 are pending and are subjected to an election/restriction requirement.

Election/Restrictions

3. Newly submitted claims 1-13, 16-19, 22, 25, 41-42, 52-53 and 66-73 are directed to two species of inventions that is distinct from the invention originally claimed for the following reasons: The instantly presented claims are directed to two divergent treatment populations, those having HCV **serotype 1b** and those having **serotype 2a/2c**. One serotype is HCV 1b, whereas the other serotype is 2a/2c. These particular serotypes are distinct from one another. MPEP § 806.05(j) sets forth that inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of

Art Unit: 1648

operation, function, or effect. See MPEP § 806.05(j). In the instant case, these differing serotypes are known to have different treatment protocols that are mutually exclusive of the other. It is noted that an effective treatment protocol for one serotype is not necessarily effective for the other. This finding is evidenced by the teachings of Izzo et al., wherein the abstract provided by Izzo et al. is provided herewith. Izzo et al. teaches that the use of arginine deiminase is effective in one serotype, and not in another serotype. Thus, in view of these differing responses, the differing serotypes are distinct from one another. Applicant is hereby required to elect one serotype for prosecution. This is a restriction requirement, under 35 U.S.C. 121, not an election of species requirement.

4. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art because of their recognized divergent treatment protocols, and a differing field of search (see MPEP § 808.02) would be necessary, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1648

7. Additionally, Applicant's election of SEQ ID NO: 1, on 10/24/2004, is noted.
8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
